ONCHOCERCIASIS 1974 FUND AGREEMENT

Agreement between the Governments of Canada, the Republic of France, the Kingdom of the Netherlands, the United Kingdom of Great Britain and Northern Ireland, the United States of America, the International Bank for Reconstruction and Development (the Bank), the International Development Association (the Association), the United Nations Development Programme (UNDP) and the World Health Organization (WHO).

Whereas (A) the Report of the Mission for Preparatory Assistance to the Governments of Dahomey, Ghana, Ivory Coast, Mali, Niger, Togo and Upper Volta (hereinafter referred to collectively as the Participating Governments) proposes a strategy for Onchocerciasis Control in the Volta River Basin Area and for the future economic development of reclaimed areas (hereinafter called the Programme);

(B) on November 1, 1973, the Participating Governments entered into an Agreement Governing the Operations of the Onchocerciasis Control Programme in the Volta River Basin Area (attached as Annex I hereto) to which WHO is also a Party and, pursuant to such Agreement have endorsed the role of (i) the Bank to assist in finding external assistance to finance the cost of the Programme and (ii) WHO to act as the Executing Agency for the carrying out of the Programme;

(C) it is expected that certain governments and organizations will soon consider the means to contribute to the financing of the first six-year phase of the Programme but that some time may lapse before arrangements to that effect will be agreed upon;

(D) it is essential that before the arrangements referred to in (C) above are concluded, work on operations forming part of the first phase of the Programme, which have so far been financed by a number of contributors, including the United Nations Development Programme, the European Development Fund, the Republic of France and the Federal Republic of Germany, be not interrupted for lack of funds;

(E) each of the Governments of Canada, the Republic of France, the Kingdom of the Netherlands, the United Kingdom of Great Britain and Northern Ireland and the United States of America, and the Bank and/or the Association have agreed to assist in the financing of the cost, at present evaluated at about seven million five hundred thousand dollars (US\$7,500,000), of services, buildings and equipment relating to the operations for the calendar year 1974 (hereinafter called the Initial Stage of the Programme) described in Annex II to this Agreement, by contributing the amount specified opposite its name below:

Canada	Can\$500,000
France	F5,000,000
Netherlands	US\$1,000,000
United Kingdom	£425,000
United States	US\$1,000,000
The Bank	US\$375,000
The Bank and/or the Association	US\$375,000

(F) each of the Governments of the Federal Republic of Germany and the United States of America (hereinafter, collectively with the Governments listed in (E) above and any government which would accede to this Agreement, called the Donors) has indicated its intention, subject to legislative approval or other action, to contribute additional amounts for the financing of the Initial Stage of the Programme.

(G) (i) WHO has agreed to act as Executing Agency in carrying out the Programme, including its Initial Stage, and (ii) the Bank has agreed at the request of the Donors to establish and administer an Onchocerciasis Special Account (hereinafter called the Account) consisting of the contributions set forth in (E) above;

Now therefore, the parties hereto agree as follows:

ARTICLE I

The Account; Contributions to the Account; Disbursements from the Account

Section 1.01. The Bank shall open the Account on its books and shall, on the date of entry into force of this Agreement, pay and credit thereto an amount in various currencies equivalent to United States dollars three hundred and seventy five thousand (US\$375,000). The Bank shall credit to the Account: (i) the amount of each Donor's contribution as the same shall from time to time be transferred to the Bank for the purposes of this Agreement, and (ii) out of its own funds and/or funds contributed by the Association such additional amounts in various currencies not to exceed in the aggregate the equivalent of United States dollars three hundred and seventy-five thousand (US\$375,000) between July 1 and December 1, 1974. All monies credited to the Account shall be used only for the purposes and in accordance with the provisions of this Agreement.

Section 1.02. (a) Upon the entry into force of this Agreement the Bank shall promptly notify each of the Donors referred to in paragraph (a) of Section 4.01 of this Agreement of the amounts required to be paid by it by a specified date as part of its contribution to the Account to cover the estimated payments to be made by WHO during the quarterly periods referred to in Section 1.05 of this Agreement.

(b) Upon the date on which this Agreement shall, in accordance with the provisions of paragraph (b) of Section 4.01 of this Agreement, take effect in respect of any Donor other than those referred to in the preceding paragraph of this Section, the Bank shall promptly notify each such Donor

of the amount required to be paid by it by a specified date as part of its contribution to cover the estimated payments to be made by WHO during the quarterly period, or the remaining balance thereof, referred to in Section 1.05 of this Agreement.

(c) To the extent possible over the nine months period ending September 30, 1974, the Bank shall request the Donors to pay the amounts referred to in this Section substantially *pro rata* to the respective amounts of their total contributions to the Account.

Section 1.03. The Account and all monies credited thereto shall be held in trust and kept separate and apart from all other accounts and assets of the Bank.

Section 1.04. The Bank shall pay to, or on the order of, WHO out of the monies in the Account for payments to be made by WHO pursuant to this Agreement after the date of its entry into force (and payments made by WHO before that date but after January 1, 1974).

Section 1.05. When WHO shall desire to withdraw any amount from the Account, WHO shall deliver to the Bank a written application therefor. Except as the Bank and WHO shall otherwise agree, any such application shall be submitted on a quarterly basis on account of estimated payments to be made during the following quarter; provided, however, that WHO shall be entitled to include in the first application amounts paid by it between January 1, 1974, and the date of such application.

Section 1.06. The Bank shall send to each of the Donors a quarterly report containing appropriate information with respect to disbursements of, and balances in, the Account.

ARTICLE II

Undertakings of UNDP

Section 2.01. UNDP shall, subject to its internal policies and procedures and pursuant to an agreement to be concluded with the Participating Governments, provide and bear the cost of expenditures for training and chemotherapeutic research during the Initial Stage of the Programme at present evaluated at about three hundred thousand dollars (US\$300,000).

ARTICLE III

Undertakings of WHO

Section 3.01. (a) Amounts disbursed from the Account shall be used by WHO exclusively to finance the cost of goods and services required to carry out the Initial Stage of the Programme.

(b) WHO shall furnish to the Bank all such information as the Bank shall reasonably request concerning the expenditure of the monies disbursed from the Account.

Section 3.02. WHO shall not incur obligations against the Account in excess of the amount of funds committed to the Account.

Section 3.03. WHO shall prepare for the Donors a semi-annual report containing appropriate information concerning the progress made in carrying out the Initial Stage of the Programme.

ARTICLE IV

Effective Date; Termination

Section 4.01. (a) This Agreement shall remain open for signature until July 1, 1974, or such other date as the Bank and/or the Association and WHO may determine and shall enter into force and effect on the date on which it shall have been signed without reservation by the Bank, the Association, UNDP, WHO and Donors indicating contributions in an amount of not less than the equivalent of United States dollars three million seven hundred fifty thousand (US\$3,750,000)⁽¹⁾. The Bank shall, on such date, notify all the other Parties named in the Preamble to this Agreement that it has opened the Account in accordance with the provisions of Section 1.01 of this Agreement.

(b) This Agreement shall take effect in respect of each of the Donors other than those referred to in paragraph (a) of this Section on: (i) the date on which each such Donor shall sign it without reservation, or (ii) if such Donor has signed it with reservation as to acceptance, on the date on which such Donor shall have notified the Bank of its acceptance. The Bank shall promptly after such date notify each of the other Parties to this Agreement.

Section 4.02. (a) This Agreement may be terminated by the Bank and/or WHO, after consultation with the Donors, by at least 90 days' notice in writing to the other Parties to this Agreement.

(b) Without any limitation upon the provisions of paragraph (a) of this Section, this Agreement shall terminate: (i) upon the completion of the Initial Stage of the Programme or (ii) upon disbursement from the Account of all amounts due to be disbursed from it under the provisions of this Agreement or (iii) upon the entry into force of new arrangements satisfactory to the Parties hereto for the financing of the Programme, whichever is earlier.

Section 4.03. Any monies remaining in the Account upon the completion of the Initial Stage of the Programme shall, to the extent that new arrangements shall have been made for the financing of the Programme and the Donors are in agreement therewith, be disposed of in accordance with the provisions of such arrangements. Failing such agreement by any Donor or termination of this Agreement pursuant to Section 4.02 (a) of this Agreement, the Parties shall consult together as to the disposal of any monies remaining in the Account or goods purchased with the proceeds thereof.

In witness whereof, the parties hereto, acting through their representatives thereunto duly authorized, have caused this Agreement to be signed in their respective names upon the dates below indicated.

(1) The Agreement entered with force on 1 March 1974.

ANNEX I

AGREEMENT

GOVERNING THE OPERATIONS OF THE ONCHOCERCIASIS CONTROL PROGRAMME IN THE VOLTA RIVER BASIN AREA

The Governments of Dahomey, Ghana, Ivory Coast, Mali, Niger, Togo and Upper Volta, (hereinafter referred to collectively as "the Participating Governments") and the World Health Organization, (hereinafter referred to as "WHO");

Considering that onchocerciasis, through the eyesight disorders it causes and the impairment of the physical condition of its victims, is one of the chief obstacles to the settlement and exploitation of the uninhabited fertile valleys of the Volta River Basin area in the territories of the Participating Governments;

Considering the strategy proposed in the Report of the Preparatory Assistance Mission to the Participating Governments for a Programme of Onchocerciasis Control in the Volta River Basin area and to prepare the way for the economic development of the reclaimed areas;

Considering the findings and conclusions of the Inter-Governmental Meeting held at State House, Accra, Ghana, from 30 October to 1 November 1973;

Have agreed to conclude the following Operational Agreement for an Onchocerciasis Control Programme in the Volta River Basin area.

PART I

Introduction and programme area

1. Introduction

The Onchocerciasis Control Programme in the Volta River Basin area, (hereinafter referred to as "the Programme"), is planned as a collaborative undertaking between the Participating Governments to be carried out with agencies of the United Nations System and the support of the international community.

The Programme will be executed through management structures proposed by the United Nations Development Programme (UNDP), the Food and Agriculture Organization of the United Nations (FAO), the International Bank for Reconstruction and Development (IBRD) and WHO (hereinafter referred to collectively as "the Sponsoring Agencies").

The Participating Governments undertake to provide the Programme with full support and, upon the withdrawal of international assistance at the conclusion of the Programme, to consolidate and maintain its achievements in the public health and socio-economic development sectors.

The overall strategy for the Programme is set out in the Report of the Preparatory Assistance Mission to Governments (PAG) which was implemented by WHO, in association with FAO, and financed by UNDP, from 1971 to 1973, following the request of the Participating Governments.

Within the context of the twenty-year Programme which it fully supports and the estimated cost of which is about US\$120 million, based on 1973 costings and exchange rates, IBRD has undertaken to use its best efforts to mobilize international resources in an amount estimated at about US\$41 million to finance the initial six-year phase.

WHO has agreed to execute the Programme, in co-operation with the Participating Governments and in association with UNDP and FAO, which Agencies will assist in preparing the ground for the subsequent economic development projects. The Sponsoring Agencies are concluding the necessary interagency co-ordination agreements for the Programme.

2. Programme Area

In order to ensure the protection of as large and homogeneous a zone as possible at reasonable cost, taking into account the economic development potential of the areas concerned, the prevalence and clinical severity of onchocerciasis and the long flight range of the vector, *Simulium damnosum*, the northern boundary of the Programme area is set as the northern limit of the distribution of the vector and the southern boundary as the Volta and Kossou lakes. The eastern and western boundaries are those of the catchment areas situated between these two parallels.

In the north-west the area begins where the river Niger enters Mali and in the north-east it ends where the same river leaves Dahomey and Niger. It comprises the basins of the following watercourses:

In Mali

right-bank tributaries of the Niger: Fié, Sankarani, La Faya, etc.;
Baoulé, Bagoé and Banifing as far as their confluence;
tributaries of the Bani, but not the Bani itself.

In Upper Volta

Black Volta, Red Volta, White Volta, Oti-Pendjari, Comoé-Léraba and their tributaries;
tributaries of the Niger in Upper Volta.

In Ivory Coast

tributaries of the Niger;
White Bandama and its tributaries as far as Lake Kossou;
Nzi as far as the Katiola-Dabakala road;
Comoé and its tributaries north of the eighth parallel;
Black Volta.

In Ghana

Black Volta, Red Volta, White Volta, Daka, Oti, Mò and their tributaries as far as Lake Volta, excluding the right-bank tributaries of the Black Volta downstream from Bamboi.

In Togo

Oti-Pendjari and its tributaries, as far as Lake Volta;
Mò and its tributaries.

In Dahomey

Oti-Pendjari and its tributaries;
tributaries of the Niger.

In Niger

right-bank tributaries of the Niger.

PART II

Programme objectives

The general objective of the Onchocerciasis Control Programme is to eliminate the disease as an obstacle to socio-economic development in the region concerned. More specifically, the objectives of the Programme will be as follows:

1. Immediate objectives

The immediate objectives of the Programme will be to interrupt transmission of the disease by eliminating the vector through periodic aerial applications of larvicides involving no risk of lasting contamination of the environment, to implement the applied research and training programmes required for pursuing the long-term objectives of the Programme and to help the Participating Governments in preparing requests to multilateral and bilateral sources for the subsequent socio-economic development of the fertile areas freed from the disease.

The interruption of transmission of the disease will involve:

- organization of aerial larvicide applications;
- entomological surveillance of the treated areas;
- epidemiological evaluation of the results of the Programme;
- permanent monitoring of the long-term safety of the operations for the environment;
- preparation of treatment schedules for onchocerciasis patients, so that the parasite *Onchocerca volvulus* can be eliminated from subjects already infected and threatened with imminent blindness.

2. Long-term objectives

In the progressive elimination of the disease and the development of the reclaimed areas, the Programme will comprise applied research and manpower

training components guaranteeing a high level of operational effectiveness and the training of the national personnel necessary for the proper execution of the Programme and the subsequent maintenance operations.

While covering the continuation of control operations against the vector, the Programme will provide for substantial development of activities in the field of onchocerciasis chemotherapy. The interruption of transmission of the disease, combined with the systematic treatment of inhabitants infested by the parasite will thus permit the development of the reclaimed fertile valleys while decreasing the recurrent cost of disease control to be borne by the Participating Governments.

The Programme will provide training for personnel at all levels in *Simulium* control, in the epidemiology and chemotherapy of the disease, in aerial treatment, and in environmental protection.

PART III

Institutional provisions and arrangements

The arrangements set forth below and as outlined in the structural chart included as Figure 1 at the end of this Part will form the basis for the management of the Programme.

1. Consultation and Co-ordination

1.1 National Committees for Onchocerciasis

As the major co-ordinating element at government level, a National Onchocerciasis Committee will be set up in each country as soon as possible before May 1974, the date when the first entomological surveillance networks are due to start operating.

Each Committee, comprising qualified representatives of the main national services concerned, will be invested with authority enabling it to act at the highest level and to command appropriate resources for:

- (a) co-ordinating the action of all national services involved in the Programme and in the subsequent economic development projects;
- (b) ensuring liaison between the Government and Programme headquarters;
- (c) preparing and organizing a large-scale campaign to inform the population of the existence, methods and aims of the Programme;
- (d) preparing the legislation and regulations required for the smooth running of the Programme, settlement, plans, and the economic development projects;
- (e) encouraging studies in preparation for the development of the reclaimed areas;
- (f) taking all appropriate measures to ensure that the results achieved at the end of the Programme are maintained;
- (g) providing liaison with the National Committees of the other countries concerned.

The Programme Director will be closely associated with the co-ordination of the work of the different National Onchocerciasis Committees. The local representatives of the Sponsoring Agencies may be associated with the work of the respective National Onchocerciasis Committees in an advisory capacity.

1.2 *Co-operation and Consultation*

Without prejudice to the arrangements referred to in paragraph 6 of this Part, consultations between the Participating Governments, the Sponsoring Agencies and such other parties as may be appropriate may be held at the request of any one of the signatories to this Agreement or at the request of the Steering Committee.

2. **Steering Committee**

The Steering Committee set up in April 1972 by the executive heads of UNDP, FAO, IBRD and WHO and composed of representatives of the executive heads of these four Sponsoring Agencies will continue to act as the organ for the guidance and co-ordination of action by the Sponsoring Agencies with respect to the Programme. Its duties will be *inter alia*, to study and approve the work plans and budgets prepared by the Executing Agency. It will supervise the implementation of the Programme and provide advice on its execution.

The Steering Committee will meet at least three times a year in the initial phase of the Programme.

In approving plans of work, the Steering Committee will take into account the recommendations of the Ecological Panel.

3. **Ecological Panel**

The Ecological Panel will comprise a small group of experts with wide experience in river basin ecology, the effects of development processes on river basins, in the epidemiology of diseases in river basins and the ecological effects of pesticides.

It will study the ecological problems connected with the Programme and with the associated economic development projects. It will propose to the Steering Committee such measures as may be needed to supplement the ecological studies undertaken under the Programme and will make recommendations to ensure effective protection of the environment.

4. **Executing Agency**

WHO, as the Executing Agency, will, in consultation with the Participating Governments, appoint a Programme Director and assign other international staff and other personnel to the Programme as specified in the plans of work. It will provide the Programme with permanent technical and administrative assistance, and will be responsible for the work plans and budgets and for the implementation of the Programme as approved by the Steering Committee.

The Executing Agency will be assisted in its work by a Scientific Advisory Panel.

5. UNDP and Associate Agencies

The UNDP, through FAO as Associate Agency or through other agencies or directly, will consider financing, with resources available in UNDP regional or national country programmes, complementary activities as may be requested by the Participating Governments in the field of economic development.

Within these arrangements and in close liaison with the National Onchocerciasis Committees, UNDP and the Associate Agencies will study the technical problems presented by the economic development of the areas that have been or are to be freed from the disease and will also give technical assistance to the Programme's Economic Development Unit.

6. Special Fund for Onchocerciasis

The principal source of financing for the Programme as a whole is to consist of contributions by certain governments and institutions to an Onchocerciasis Fund, to be administered by IBRD under arrangements to be concluded between the governments and institutions concerned, and the Sponsoring Agencies.

7. Programme Director

The Programme Director will be responsible for field operations. He will be stationed at the headquarters of the Programme which will be situated at Ouagadougou, Upper Volta. He will receive permanent technical and administrative assistance from WHO (Regional Office for Africa and Headquarters) as Executing Agency, and from FAO, as Associate Agency.

Operational problems submitted to the Executing Agency by the National Onchocerciasis Committees will be channelled through the office of the Programme Director.

Within his own office there will be a unit responsible for external relations and information, and initially he will be assisted by the following specialized sections as well as by an Economic Development Unit.

7.1 Simulium Control Operations Section

This Section will plan, have carried out, and supervise the control operations against the vectors of onchocerciasis and will be responsible for studies on the protection of the environment. It will define the associated applied research and personnel training activities that are necessary for the effective implementation of these operations.

7.2 Epidemiology Section

The Onchocerciasis Epidemiology and Public Health Section will plan, have carried out, and supervise the epidemiological evaluation of the Programme and define the associated applied research and personnel training activities in connection with the chemotherapy of onchocerciasis and the parasitological and clinical evaluation of the control operations. At the request of national authorities, this Section will define the specific health problems of the areas to be reclaimed and provide technical advice on the measures to be taken to provide effective medical protection for the populations to be settled there.

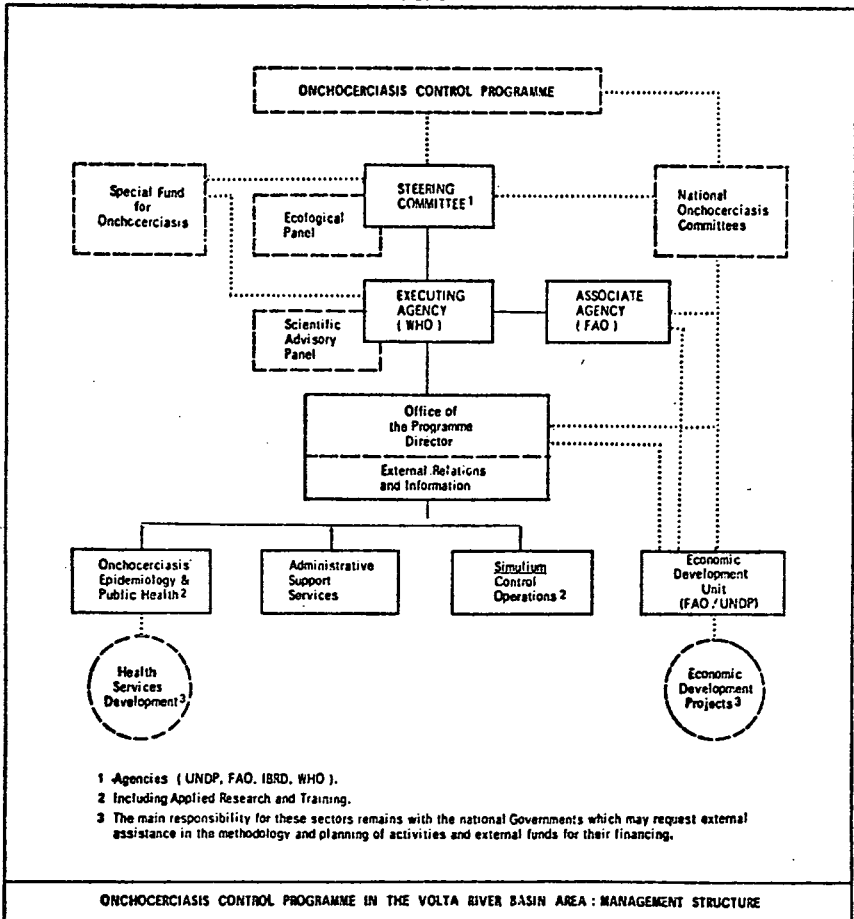

7.3 Administrative Section

The Administrative Support Services Section will provide the necessary administrative support for the implementation of the Programme in the field and will manage the joint technical and logistic services. In liaison with the appropriate services of the agencies sponsoring the Programme, this Section will prepare the documents concerning recruitment, supplies, and contractual services for the Programme or will provide the basic data so that these documents can be prepared.

8. Economic Development Unit

The Economic Development Unit will serve as the focal point for the exchange of information with respect to national actions in the developmental aspects of the programme, for which purpose it will maintain close liaison with the National Committees for Onchocerciasis. Subject to the arrangements referred to in paragraph 6 of this Part, the unit will assist the Programme Director in identifying economic development projects which might be the object of further study and consideration by the governments and institutions responsible for the financing and carrying out of the necessary pre-investment studies.

FIGURE 1

PART IV

Programme execution

The Programme will be launched in 1974 as a joint undertaking, the realization of which will require the full collaboration of each of the Participating Governments and of the agencies responsible for its execution and financing. The strategy as described in detail in the Report of the PAG Mission (Document OCP/73.1 dated 20 August 1973) and in the technical annexes to that report (Annexes V-2, V-3, V-4, V-5 and V-6) will serve as the strategy of the Programme, subject to such adaptations as may reveal themselves necessary in the light of operating experience.

Each of the Participating Governments concerned undertakes to give high priority throughout the duration of the Programme to onchocerciasis control and to the development and settlement of the reclaimed areas. The health services and the national and/or federal research institutes of these countries will contribute to the basic and applied research that is necessary for the proper execution of the Programme and will help to train the required numbers of national specialists.

Each of the Governments undertakes to co-operate unreservedly, with the Executing and Associate Agencies so that the Programme can be carried out under the optimum conditions.

1. Contributions of the Participating Governments

The specific contributions of each Participating Government, in cash and/or in kind, will be fixed by joint agreement between the Government and the Executing Agency in special protocols covering operations in each country. These protocols will constitute an integral part of this Agreement and be subject to its general provisions.

2. Phasing of operations

On account of the many problems of logistics, establishment of infrastructure and staff training that will arise from the start of the Programme, the introduction of vector control operations will be phased over a period of three years from 1974 to 1976. To ensure the continuity of the control operations, and at the same time to make use of the knowledge of the terrain already available, operations will start in 1974 in the area covered by the FED/OCCGE* onchocerciasis control campaign. The work will be scheduled in three main phases:

Phase I: will cover the basins of the Black Volta, the Comoé-Léraba, the Bandama and the Banifing, together with the isolated onchocerciasis focus of Bandiagara. The implementation of this phase will mean the immediate involvement of Ghana, Ivory Coast, Mali and Upper Volta.
Phase II: will commence in 1975 with control operations being extended to the basins of the Red Volta, the White Volta and the Daka, belonging to the Volta Basin proper.

* European Development Fund/Organization for Co-ordination and Co-operation in the Control of the Major Endemic Diseases.

Phase III: will commence in 1976 and will complete the coverage of the Programme area by incorporating the Oti-Pendjari and Mò basins, situated in Dahomey, Ghana and Togo, and the basins of the southern tributaries of the Niger situated in Dahomey, Ivory Coast, Mali, Niger and Upper Volta. The experience obtained during the first two phases of the Programme will be used in solving problems that may arise on account of the uneven relief of the eastern part of this area and on account of the considerable flow of some of these rivers in the middle of the rainy season.

Vector control operations will be initiated at the end of the rainy season when there is a natural drop in the vector population.

3. Larvicidal treatment

Vector control will be based on the periodic application of insecticides, generally by air, immediately upstream from the larval breeding-places.

Aerial application of insecticides will require four to eight aircraft (fixed wing and helicopters), depending on the season, to cover the entire region once Phase III of the Programme has started. The general treatment plan, specifying the daily task of each aircraft according to the day of the week and the season, will be adjusted to the meteorological and hydrological conditions on the basis of information obtained at each point in the area and transmitted by radio to the Programme headquarters.

The arrangements concerning treatment will be flexible. The central and northern parts of the Programme area, protected from reinfestation by the treatment of the region further south may require only sporadic treatment. The western and eastern boundaries and more particularly the southern part of the Programme area, may require continuous treatment. All unusual meteorological conditions will be followed by supplementary geographical investigations and, if necessary, additional treatment.

The flight range of the aircraft used, will enable the treatment teams during periodic maintenance operations, to use the existing facilities of well-equipped aerodromes. For daily maintenance operations, the teams will mainly use existing airstrips and it will only rarely be necessary to establish a new base of any size. The bases it is planned to use are shown in Table 1 at the end of this Part.

4. Entomological surveillance

Initially, the entomological surveillance network will comprise seven sectors, each entrusted to an entomologist, and 24 subsectors run by suitably trained technicians (Table 2, at the end of this Part). It will have a flexible structure that will be revised according to operational needs as the Programme progresses.

The network will come into action several months prior to the start of treatment operations in order to carry out a final investigation of the Programme area. The entomological surveillance teams will observe the density and distribution of the vector and will record data on the flow of watercourses harbouring the vector larvae. This information will be passed on to the Programme headquarters by the swiftest means, including radio.

During the operations, only larval breeding-places actually harbouring the vector will be treated.

During the first three years of the Programme the entomological surveillance network will be strengthened in order to provide a preliminary epidemiological assessment of the operations by determining, in representative sections of the area, the trends in residual transmission and the risks incurred by individuals settling in the uninhabited valleys.

5. Epidemiological assessment

The epidemiological assessment will be based on periodic examination of the inhabitants of some 150 indicator villages distributed throughout the Volta River Basin area in order to determine the parasitological and clinical changes occurring during the implementation of the Programme, both in the present inhabitants of the area and in new arrivals.

Standardized examination methods will be used during the initial surveys and after that surveys will be carried out every three years. This assessment will be carried out by two parasitologists and two ophthalmologists on a full-time basis.

6. Applied research

The continuity of the Programme operations and the continuous improvement of methodology will be ensured by an applied research programme, mainly covering the following points:

- vector biology and sampling of vector populations;
- development and evaluation of insecticides and formulations;
- specialized spraying equipment;
- protection of non-target fauna and the environment;
- epidemiology and chemotherapy of onchocerciasis.

Research involving human subjects carried out under the Programme will be designed, administered and operated in such a fashion that the rights of the subjects shall not be infringed, that their welfare shall be protected and that the potential benefits of such investigations shall justify whatever risks may be inherent in them.

7. Training

Training activities aimed both at solving the problems of recruitment at all levels and at ensuring the use of standardized methodology throughout all studies and surveys will also form an important component of the Programme. They will take into account the need to strengthen the staff by personnel originating from the Programme area so that such personnel can gradually take over the responsibility for surveys and operations and eventually the running of the Programme itself.

8. Scientific advisers

An Ecological Panel and a Scientific Advisory Panel, attached respectively to the Steering Committee and to the Executing Agency, will provide advice on the measures to be taken to ensure that the operations are fully effective and to guarantee satisfactory protection of the environment.

9. Distribution of activities and budget

Except in special cases, insecticide treatments, activities in applied research and the training of specialist staff will be carried out on a sub-contracting basis, while the Programme headquarters will assume direct responsibility for the activities of the entomological surveillance network and the epidemiological assessment teams. An indication of the estimated costs for each year and each major operating period is given in Table 3 at the end of this Part for the whole duration of the Programme, namely for the period 1974–1993.

10. Support of the Executing Agency and Associate Agency

The onchocerciasis control operations will receive the constant support of the Headquarters and Regional Office for Africa of WHO; assistance to Governments in preparing and presenting economic development projects will, within available resources, be provided by UNDP and FAO, in close collaboration with the Economic Development Unit of the Programme.

PART V

General provisions

1. Legal arrangements

Legal arrangements to cover the operations undertaken under the Programme will be governed by the provisions of the respective standard and basic agreements concluded between UNDP, WHO, FAO and any other associate agency and the Participating Governments.

Without restricting their generality, these agreements will cover the privileges and immunities of the agencies sponsoring the Programme, their staff, employees and sub-contractors when engaged in operations provided for in the Programme, and responsibility for loss, damage or injuries resulting from operations carried out under the Programme.

Nationals and permanent residents of the Participating Countries appointed by the Executing Agency to serve on the staff of the Programme will be employed in accordance with the Staff Regulations and Rules of the World Health Organization.

2. Sub-Contractors and their personnel

Sub-Contractors of the Executing Agency and the Associate Agency and their staff (except for nationals of the countries concerned employed on a local basis):

- (a) will be immune from legal process in respect of all acts performed by them in their official capacity in the execution of the Programme;
- (b) will be immune from national service obligations;
- (c) will be immune together with their spouses and relatives dependent on them from immigration restrictions;
- (d) will be accorded the privilege of bringing into the country reasonable amounts of foreign currency for the purposes of the project or for personal use of such personnel, and of withdrawing any such amounts brought into the country, or, in accordance with the relevant foreign exchange regulations, such amounts as may be earned therein by such personnel in the execution of the Programme;
- (e) will be accorded together with their spouses and relatives dependent on them the same repatriation facilities in the event of international crises as diplomatic envoys.

All personnel of the Executive Agency's contractors will enjoy inviolability for all papers and documents relating to the project.

The Participating Governments will either exempt from, or bear the costs of any taxes, duties, fees or levies which they may impose on any foreign firm or organization which may be retained by the Executing Agency and on the foreign personnel of any such firm or organization in respect of:

- (a) the salaries or wages earned by such personnel in the execution of the Programme;

- (b) any equipment, materials and supplies brought into the country for the purposes of the Programme or which, after having been brought into the country, may be subsequently withdrawn therefrom;
- (c) any substantial quantities of equipment, materials and supplies obtained locally for the execution of the Programme, such as, for example, petrol and spare parts for the operation and maintenance of equipment mentioned under (b) above, with the provision that the types and approximate quantities to be exempted and relevant procedures to be followed will be agreed upon with the Participating Governments and, as appropriate, recorded in the annual and general plans of action; and
- (d) as in the case of concessions currently granted to the personnel of the Sponsoring Agencies, any property brought, including one privately owned automobile per employee, by the firm or organization or its personnel for their personal use or consumption or which after having been brought into the country, may subsequently be withdrawn therefrom upon departure of such personnel.

The privileges and immunities to which such firm or organization and its personnel may be entitled, referred to in the paragraphs above, may be waived by the Executing Agency where, in its opinion, the immunity would impede the course of justice and can be waived without prejudice to the successful completion of the Programme or to the interest of the Executing Agency.

The Executing Agency shall provide the Participating Governments with the list of personnel to whom the privileges and immunities enumerated above shall apply.

3. Customs and tax exemption

The Participating Governments will waive or defray any customs duties and other charges related to the clearance of the equipment and supplies including spare parts, fuel, lubricants, insecticides, imported for the purposes of the Programme.

4. Documentation, technical information and reports

Subject to security regulations in force, the Participating Governments will provide access to all technical reports, maps, files and other items of information, whether published or not, that may be regarded as necessary for the execution of the Programme.

The Participating Governments will provide the Programme free of charge, by the swiftest means, with the meteorological and hydrological information needed for the proper execution of the operations.

The Steering Committee will institute a schedule for adequate reporting by the Executing Agency and other organs participating in the Programme.

5. Overflight and landing rights

Each Participating Government will take the necessary steps to facilitate the crossing of borders by the Programme's aircraft on flights from or to adjacent countries, it being understood that full flight plan information will

be made available by the Programme to the National Civil Aviation Authorities involved. Similarly, the crossing of borders by ground teams will be facilitated by each Participating Government.

6. Assistance from aviation services

The Participating Governments will make the necessary arrangements to ensure that the aircraft used by the Programme can receive assistance from the national civil (and possibly military) aviation services and use the corresponding infrastructure free of charge.

7. Telecommunications network

The Participating Governments agree that an intercountry telecommunications network for the Programme may be established by the Executing Agency as Operating Agency for this purpose. The Governments, having reached agreement on the frequencies that may be allocated to the Programme for this network, will authorize the Executing Agency to use them continuously for its technical requirements within the Programme area.

8. Sites and constructions

The Participating Governments will make available to the Programme, for the whole period of its execution, the land needed for constructions required by the Programme, where such constructions do not exist and cannot be provided by the national authorities.

9. Water, electricity, postal services and telecommunications

The Participating Governments will ensure that the headquarters, sectors and subsectors of the Programme are supplied where available with water and electricity and with telephone and telegraph services within their territories.

10. Disposition of equipment and supplies

All material, equipment and supplies which are purchased from the resources of the Programme will be used exclusively for the execution of the project, and will remain the property of the Programme in whose name it will be held by the Executing Agency.

Arrangements may be made, if necessary, for a temporary transfer of custody of equipment to local authorities during the lifetime of the Programme, without prejudice to the final transfer.

Prior to the completion of the Programme, the Participating Governments and the Executing Agency will consult as to the disposition of all project equipment provided by the Programme. Title to such equipment will normally be transferred to the Participating Governments or to entities nominated by them, when it is required for continued operation of the Programme or for activities following directly therefrom. The Executing Agency may, however, at its discretion, retain title to part or all of such equipment.

PART VI

Final provisions

1. This Agreement will come into effect upon signature by the parties and will remain in effect until the international assistance to the Programme is withdrawn, including such period of times as may be necessary for winding up arrangements.

2. This Agreement may be modified at any time by mutual consent of the parties.

In witness whereof, the undersigned, being duly authorized, have signed this Agreement.

Done in eight copies each in the English and French languages at Accra on 1 November 1973, the text in both languages being equally authentic.
